Ghent, Belgium • +32473517977

Summary

Experienced Backend and DevOps Engineer specializing in **Go** (scalable server-side applications) and **Kubernetes** infrastructure. Proficient in mobile development using **Flutter** (Google's cross-platform UI framework). Strong background in cloud infrastructure (GCP, Azure, AWS), infrastructure-as-code, and microservices architecture.

Core Competencies

Backend Development: Go, Java (Spring Boot), Python, PostgreSQL **DevOps & Infrastructure:** Kubernetes, Terraform, Docker, Helm, CI/CD Pipelines **Mobile Development:** Flutter (cross-platform mobile apps for iOS/Android) **Cloud Platforms:** Google Cloud, Azure, AWS, Digital Ocean **Monitoring & Observability:** Prometheus stack, Apache Superset

Personal Projects

Plowshare — A platform for sharing Magic the Gathering games

Helm Charts — Open-source Kubernetes deployments

Experience

Backend Engineer | [Battmobiel](#) | Apr 2024 - Sep 2025 • Develop backend services using **Go** (efficient, concurrent programming language) and Java Spring Boot • Build cross-platform mobile applications with **Flutter** (single codebase for iOS & Android) • Design and implement scalable microservices architecture for mobility solutions

DevOps Engineer | [Nexuzhealth](#) | Dec 2023 - Apr 2024 • Managed Kubernetes clusters and infrastructure automation using Terraform on Google Cloud • Implemented CI/CD pipelines for healthcare platform deployments

Infrastructure Engineer | [Alby](#) | *Dec 2021 - Dec 2023* • Architected and maintained Kubernetes infrastructure for Lightning Network services • Developed [Indhub.go](#), a Go-based Lightning wallet backend • Co-created [Nostr Wallet Connect](#), an encrypted payment protocol

Founder | Flitz | *Apr 2021 - Nov 2021* • Built Lightning-native Bitcoin DCA platform with Go backend and Flutter mobile app • Deployed services on Kubernetes with C-Lightning integration

Infrastructure Engineer | [Strike](#) | *Aug 2021 - Oct 2021* • Managed enterprise Lightning node infrastructure on GCP using Kubernetes and Terraform

DevOps/Backend Engineer | [Battmobiel](#) / [Sofico](#) | *Jan 2020 - Mar 2021* • Built Azure Kubernetes Service (AKS) infrastructure and CI/CD pipelines • Developed Spring Boot microservices using Java and Quarkus framework

DevOps/Backend Engineer | [Be-Mobile](#) | *Apr 2018 - Sep 2019* • Automated deployments using Kubernetes, Jenkins, and Helm • Developed Go services for GPS data processing and map visualization

Deep Learning Engineer | [Robovision](#) | *Sep 2017 - Feb 2018* • Built deep learning systems for industrial computer vision applications
